SNOW FALL

24h : 0-0 cm	48h : 0-0 cm	7 days : 16-19 cm	Season : 453-611 cm
Surface		Base	Coverage
Spring conditions, Heavy snow (humid), Corn snow, Firm, Variable		Natural snow, Firm, Man-made snow, Soften	Thin (natural snow), Bare spots (natural snow), Good in général (man-made snow)

COMMENT

THE SKI SEASON IS NOT OVER! WE WILL BE BACK ON FRIDAY FOR LONG EASTER WEEKEND! Spring skiing, Friday Live music at the après-ski, egg hunt, Dj, and more! If Mother Nature allows! Subscribe to the newsletter to not miss on anything! ----- SUNDAY REPORT There's still a good snow cover on the mountain, so let's keep skiing! It's spring skiing at its best. Come enjoy it and have fun on the slopes. The lifts in operation today will be lifts II and IV, which will give you access to the 19 trails and some open glades. Trail status may vary after patrol inspection. Typical spring conditions. Surfaces firm up at night and soften during the day depending on the temperature. Conditions will be variable. Granular, corn snow, softened snow that can be sticky in places, and bumpy surfaces will be encountered progressively, depending on the trail. All this on firm to softened bases. A few thinner spots and perhaps a few bare spots may begin to appear in your path. Be careful The temperature observed at 5am was 2o under partly cloudy skies. The Chalet Alt.400m with its cafeteria is open and the Chalet Alt.840m at the summit is open in refuge mode only The trails that have been groomed (or not) are posted on the daily report, in the main chalet and at the lift gates. Alpine touring trails are closed for the season. For alpine touring on ski slopes outside chairlift hours, see the schedule and authorized trails, as well as all the details on the alpine touring page. See pictures of the day every day on flickr.com/montsutton Buy your ski tickets and Alpine Touring ticket online here or see all our promotions. And if you haven't already, sign up for our daily newsletter so you don't miss anything!
