| Surface | Base | Coverage | |
| Powder, Packed, Man-made | Natural snow, Firm, Man-made snow | Good in general (natural snow), Complete (man-made snow) | |

COMMENT

..WOW.. 20 cm of snow has accumulated at the base since yesterday morning, and another 25 is expected by Friday. Today, Wednesday, January 8, it's still snowing, it's still windy, it's still wonderful. Yesterday, the sliding conditions were better than expected since it snowed all day, so imagine today, it continues. Take the opportunity to try out your fat skis. Our teams are still blowing snow with their snowguns on the Miracle and the St-Bernard as well as at the bottom of the Mohawk, near lift no. 2. Pruners are also still at work on the ski hill. Around ten trails were groomed last night. You will see the daily report posted everywhere in the main chalet and outside. So powdery surface, firm bottom, if you can touch it. The natural snow trails and glades will be perfect. Get dressed; don't forget your ski goggles; wind and snow again for today. Stay vigilant because this mix makes visibility reduced in places. Go, you're late; we're waiting for you. Have a good day. Chalet 840 open The alpine touring trails are all open! At 5 am the temperature was -13 degrees and snowing See pictures of the day every day on flickr.com/montsutton To receive by mail the ski conditions, news, activities and promotions, subscribe to our newsletter!
