

# Nature's Hunt and Seek

Do you feel ready to take on the challenge set by Mont Sutton?  
Make your way up to an altitude of 680m. Keep your eyes wide open and look around!  
When you spot the animals shown on your sheet, circle them.

Take your time and have fun!  
Psst... You'll find a few clues on the back!

## Indice #1

The animals are hidden all along the yellow trail. Keep your eyes wide open!

## Indice #2

As soon as you get off the chairlift, look to your left, between the chalet and the trail sign, that's where the path begins, right over the red arrow! If you see the frog sign, you're in the right place!

## Indice #3

You've reached the end of the trail when you see the skiing marmot! If you missed any animals along the way, you can go back and find them!
